

For Windows 7 / IE8 Users:

-Enabling the CPE Web Utility in IE8 or later

Without the latest firmware, the CPE web utility will not be accessible in IE8 or later. To enable communication in that browser, a FW upgrade is required. Due to the age of this product line, this firmware is a beta and further support is not guaranteed. Please select your model from the support page and download, and then upgrade to the “Beta FW for IE8” version. It is highly recommended that you upgrade prior to upgrading your browser and/or operating system.

This firmware is required to be able to access the web utility from an Internet Explorer 8 or later browser. Please upgrade before using IE8.
